

Pizza Sales SQL Queries: Key Performance Indicators & Trends

This presentation delves into key performance indicators (KPIs) and sales trends derived from pizza sales data using SQL queries. We will explore total revenue, average order value, total pizzas sold, and order frequency. Additionally, we'll analyze daily and hourly order patterns, sales distribution by pizza category and size, and identify top and bottom-selling pizzas.

 by Sarthak Chaudhary

Key Performance Indicators (KPIs)

\$817K

Total Revenue
Overall sales generated.

\$38.31

Avg. Order Value
Average amount spent per order.

49.5K

Total Pizzas Sold
Cumulative number of pizzas sold.

21.3K

Total Orders
Total number of distinct orders.

These core KPIs provide a snapshot of the business's financial health and operational efficiency. Understanding these metrics is crucial for strategic decision-making and identifying areas for improvement in sales and customer engagement.

Average Pizzas Per Order

2.32

Average pizzas per order

Calculation

Total quantity divided by total distinct orders.

Implication

Insights into customer purchasing habits.

The average number of pizzas per order is a vital metric for understanding customer behavior and optimizing promotions. A higher average could indicate successful upsell strategies or larger group orders, while a lower average might suggest opportunities for bundle deals or family-sized options.

Daily Trend for Total Orders

Analyzing daily order trends helps in staffing and inventory management. Friday consistently shows the highest number of orders, followed by Thursday and Saturday, indicating peak demand towards the end of the week. Sunday has the lowest orders, suggesting potential for targeted promotions on slower days.

Hourly Trend for Orders

Understanding hourly order patterns is crucial for optimizing kitchen operations and delivery schedules. The data reveals significant peaks during lunch (12 PM) and dinner (6 PM), with a noticeable dip in the mid-afternoon. This information can guide staffing levels and promotional timing.

Sales by Pizza Category and Size

Sales by Category

- Classic: 26.91%
- Supreme: 25.46%
- Chicken: 23.96%
- Veggie: 23.68%

Classic and Supreme pizzas lead in sales, indicating strong customer preference for traditional and premium options. Chicken and Veggie categories also contribute significantly, showing a diverse customer base.

Sales by Size

- Large (L): 45.89%
- Medium (M): 30.49%
- Small (S): 21.77%
- XL: 1.72%
- XXL: 0.12%

Large pizzas dominate sales, suggesting that customers often order for groups or prefer larger portions. Medium and Small sizes also have a substantial share, catering to individual or smaller group needs.

Top 5 Best Sellers by Total Pizzas Sold

1 The Classic Deluxe Pizza

2453 units sold, a consistent favorite.

2 The Barbecue Chicken Pizza

2432 units sold, popular for its unique flavor.

3 The Hawaiian Pizza

2422 units sold, a controversial but beloved choice.

4 The Pepperoni Pizza

2418 units sold, a timeless classic.

5 The Thai Chicken Pizza

2371 units sold, appealing to adventurous palates.

Identifying top-selling pizzas helps in inventory management and marketing efforts. These pizzas consistently drive sales, indicating strong customer demand and potential for featured promotions or bundle deals.

Bottom 5 Best Sellers & Filtering Data

The Brie Carre Pizza

490 units sold, the lowest performer.

The Mediterranean Pizza

934 units sold, a niche offering.

The Calabrese Pizza

937 units sold, with limited appeal.

The Spinach Supreme Pizza

950 units sold, a less popular veggie option.

The Soppressata Pizza

961 units sold, at the higher end of bottom sellers.

Understanding bottom sellers is crucial for menu optimization or targeted promotions. These pizzas may require re-evaluation, special offers, or removal from the menu. SQL WHERE clauses allow filtering data by month or quarter for deeper analysis, enabling insights into seasonal trends or specific periods.
